DETAILED ACTION***Allowable Subject Matter***

Claims 1-3, and 6-7 are allowed. The following is an examiner's statement of reasons for allowance: The claims are allowable over the prior art of record because the teachings of the references taken as a whole do not teach or render obvious the combination set forth, including that of a door locking assembly in combination with a doorframe and a door, where the door locking assembly has a locking arm mount, and arm with a loop attached to the arm, a lock mount fixed to the doorframe, the lock mount having a rod, a cylinder with a slot extending therethrough to receive the loop, a bar being mounted in the cylinder, and a lock positioned in the cylinder and through the loop

U.S. Patent Number 3,600,026 to Savio discloses a locking assembly having a locking arm mount fixed to a first side of a frame, an arm having a first end and a second end, where the first end is pivotally coupled to the locking arm mount, a bore extending through the arm, a lock mount fixed to another side of the frame, where the lock mount includes a rod attached to the other side of the frame, a cylinder having a perimeter wall attached to an end of the rod, the perimeter wall having a slot extending therethrough, and a lock positioned in the cylinder for selectively locking the arm in a locked position. However, Savio does not disclose the locking assembly in combination with a doorframe and a door (claim 1, lines 3-6; claim 6, lines 3-6; and claim 7, lines 2-5), as well as the arm having a loop (claim 1, line 11; claim 6, line 17; and claim 7, line 16) attached thereon.
